FRUIT

See next page for prices and a complete list of all fruit trees, berry bushes and Grapes.

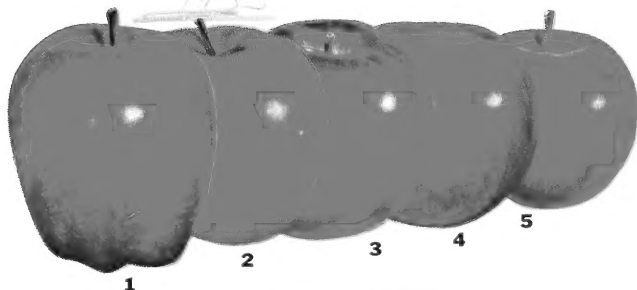

GRAPES

You can have your own Grapes for dessert, jelly and juice. Plant about 8 feet apart. Easy to grow.

Blue Jay

Red Amber

APPLE TREES

Bailey's Apple trees are three years old and varieties found to be best suited to conditions in the North Central states. The trees are grafted on roots grown especially to give you the hardy stock that is needed in this region.

1. **Minnetonka Beauty** is an Apple with such exceptional qualities that we do not hesitate to recommend it to every fruit grower in the North.
2. **Northwestern Greening**. This is the most popular green Apple grown in the North Central states. The tree is large, vigorous, annual bearing.
3. **Fireside**. You will find this large, long-keeping Apple to be one of the highest quality varieties ever developed at the Minnesota Fruit Breeding Farm.
4. **Wealthy**. This Apple has proved itself over the years. Wealthy is still Bailey's leading Apple. The fruit ripens early in September and keeps to Christmas.
5. **Beacon**. This early Apple was originated at the Minnesota Fruit Breeding Farm. The solid, bright red fruit ripens a few days after Duchess, excellent quality.

RASPBERRIES

Hardy black and hardy red varieties:

BAILEY'S FOR NURSERY STOCK

BUY WITH CONFIDENCE DIRECT FROM THE GROWER

Select Your Stock by Mail or Select Your Stock at the Nursery

Mail Order Terms of Sale

Payment in full should accompany all orders. Money orders, checks or bank drafts are the most convenient means of making payments. If you send cash, enclose it in heavy paper and register your letter.

Payment of one-fourth the purchase price in advance and C.O.D. for the balance is acceptable. Please remember that it costs you extra because the Post Office and the Express Company make an additional charge for C.O.D. shipments.

All stock is priced f.o.b. St. Paul or at the nursery, unless otherwise stated.

Mail Order Shipment

Many of the smaller items can be shipped by parcel post at less expense than by express. Include 10% for packing and postage if parcel post is desired. Trees over 4 feet in height cannot be sent by mail. Shelter belt trees are shipped prepaid.

You Are Invited to Visit Our Nurseries

Our nursery is located just off Highway 61, 10, and 100 at the city limits of St. Paul, across the river from South St. Paul. We invite our customers to come to the nursery to select their stock. We assure you, however, that mail orders will receive our personal attention and your stock will be selected with utmost care.

BAILEY'S GUARANTEE

1. We guarantee our stock to be true to name. If it should prove otherwise, we shall replace it free or refund the amount paid.
2. We guarantee our stock to be of high quality, to have been properly handled, and to reach you in prime condition for planting. Examine it carefully upon arrival; if you are not satisfied, return it at once and we shall replace it or refund your money.
3. Under reasonable conditions our stock should grow. If it fails to grow, we shall replace it at one-half the original price, providing you notify us before October 1, 1953, and include one-half the original purchase price with your letter.
4. We guarantee to do our utmost to give you satisfaction; however, it is agreed that the original purchase price shall be the maximum damages allowed.

Evergreens for Home Gardeners!

GROW YOUR OWN ORNAMENTAL EVERGREENS

Garden enthusiasts are invited to share in the pleasure of growing ornamental evergreens for their own landscape plantings. Home gardeners everywhere have found it interesting and profitable to grow evergreens. An assortment of the smaller sizes of the more popular varieties can be planted in the garden. Upkeep is not a problem because the trees can be cultivated along with the other garden plants. They can be grown until suitable for planting in the permanent landscape.

Balled and Burlapped EVERGREENS

Bailey's grow their own evergreens. This is important. You can be sure the evergreens we grow are hardy.

Pfitzer Juniper. Probably no Juniper is more widely planted than this low, broad evergreen. It is hardy and does well in a wide variety of soils and exposures. It tolerates partial shade and also does well in full sunlight. It may reach 3 to 4 feet in height and 6 or more feet in diameter; however, it is readily trimmed to desired size. The color is predominantly green although a tinge of blue may be evident. It is extensively used in foundation plantings.

Savin Juniper

PINE

Ponderosa Pine. The Ponderosa Pine is generally accepted as the best large Pine for use in landscape plantings. It sometimes reaches a height of about 60 feet and a diameter of 40 to 50 feet. It is fast growing and adapts itself to a wide variety of conditions.

Mugho Pine. Here is a low growing dwarf Pine. It is compact and round in shape. The size can be controlled by trimming. The foliage is deep green. It is hardy and will tolerate some shade.

SPRUCE

Black Hills Spruce. A robust appearance is characteristic of this handsome Spruce. It is symmetrical, compact and bushy in habit. It is very hardy and is highly resistant to drought. It will do well on a wide variety of soils. A bluish tinge may be seen in the deep green of the foliage. It may reach a height of 40 to 50 feet, averaging about 1 foot a year in new growth.

Colorado Blue Spruce. This is probably the most popular ornamental Spruce. It has a symmetrical, conical outline. It is hardy and drought resistant. It grows well in a wide variety of conditions from dry, sandy to rich, moist situations. The color ranges from green to powdery blue. Not all of the trees have the striking blue sheen. The greens and the blues are separated in the price list. The trees may reach a height of 40 feet and a spread of 20 to 25 feet.

Colorado Blue Spruce

Care and Planting Instructions Given With Each Purchase.

ARBORVITAE

American Arborvitae. Everyone is familiar with the flat, lacy foliage of the American Arborvitae. It is one of our native trees. It naturally grows in a pyramidal shape. It may attain a height of 40 feet and a spread of 8 to 10 feet, but it can be limited in size by trimming. It grows best in moist locations.

Globe Arborvitae. This dwarf of the American Arborvitae grows to about three feet in diameter. The round form is maintained naturally and does not require trimming. Like the American Arborvitae, it grows best in moist locations.

Pyramidal Arborvitae. Here is an Arborvitae that was selected because of its rich green color and slender, erect form. Old trees may reach a height of 25 feet; the height can be limited and the growth made more compact by trimming. This tree is undoubtedly the most widely planted Arborvitae used in landscape planting.

Siberian Arborvitae. Because of its extreme hardness this Arborvitae was named "Siberian." The dark green foliage is thicker and heavier than that of its parent, the American Arborvitae. It is dense in growth and conical in outline. It maintains its normal shape well, but can be trimmed to any desired form. If it is not trimmed it may reach a height of 10 feet.

JUNIPER

Juniper Dundee. Attractive coloring and compact, pyramidal habit of growth distinguish this widely planted variety of Red Cedar. The tips of the branches tend to stand upright. Throughout the spring and summer it is bluish green, but with the coming of frost it changes to a purplish plum color for fall and winter. It is very hardy.

Moffetti Juniper. This is a popular variety of the true Silver Juniper. It is an upright evergreen with attractive light blue foliage. The new growth on the tips of the branches tends to be pendent. Like most Junipers, it can be trimmed or grown naturally. It is very hardy.

Pathfinder Juniper. It is believed that this evergreen has the most beautiful silvery blue coloring of all the varieties of the true Silver Juniper. The habit of growth is upright with a somewhat broader and more bushy base than is found in other varieties of the true Silver. The tips of the branches are of fine texture and tend to be upright in habit. It is hardy.

Red Cedar. Beautiful green pyramidal tree. The ideal tree to use in foundation landscaping or as a specimen tree. It is very hardy, a native of the midwest. They are adapted to our soil and temperature.

Silver Juniper. This Juniper has the form of the Red Cedar, but it does not grow as large, and has attractive silvery foliage. It is the parent of such beautiful grafted Junipers as the Chandler Blue Juniper, Moffett Juniper, Pathfinder Juniper and Welch Juniper.

Welch Juniper. This very handsome Juniper is one of the more recent grafts of the Silver Juniper. Its most attractive quality is the compact, narrow, upright habit of growth. The vertical position taken by the new growth emphasizes the upright form. It has a deeper blue-green color and a more compact growth than other grafted Silver Junipers. It has proven to be very hardy.

Plant Bailey HEDGES

Bailey's hedge plants should be spaced 12 inches apart excepting for Honeysuckle and Spirea Vanhoutte which may be spaced 2 feet apart. A single row of plants is enough for a good hedge. A double row is desirable only when a wide hedge is wanted quickly. A trench should be dug deep enough to receive the roots without crowding. If one side of the ditch is straight the plants may be set against it to form a straight hedge. The lower branches should be slightly covered with soil to insure dense branching. Full description of each plant grown as a shrub.

SPIREA, VAN HOUTTE (Bridalwreath)					
			50.00	60.00	

Buckthorn, Common. If a heavy impenetrable barrier is desired this shrub will meet your needs. It can be trimmed to desired height from 3 to 8 ft. It is not recommended for rural areas because it is host to oat rust.

Cotoneaster, Peking. This handsome shrub with attractive, thick, glossy leaves is useful for medium sized hedges. It may or may not be trimmed. Is thoroughly hardy.

Current, Alpine. The compact, upright habit of growth of this shrub makes it an outstanding hedge plant. It grows fairly well in heavy shade and holds the dark green foliage until late fall. It is excellent for trimming.

Sorry

we cannot accept B&B evergreen orders for shipping, due to high cost of packing and transportation, also risk of delay in transit causing B&B evergreens not to arrive in good condition.

Plant Trees for a Lifetime of Comfort — Both for Shade and Shelterbelt

Ash, Green. (White). Here is one of the most dependable trees. It is fast growing, long lived and drought resistant. It will grow well in a wide variety of soil conditions. Height 60 feet.

The Birches

Birch, Cut Leaf Weeping. The drooping branches and the finely cut leaves are attractive. The white bark provides color throughout the year.

Birch, Paper. White Birch or Canoe Birch. The white bark and clear yellow leaves in fall provide showy color. Height 60 feet.

Ash, Mountain. An attractive ornamental, especially in late summer when it is covered with clusters of red berries. Height 35 feet, spread 25 feet.

Elm, American. Everyone knows the American Elm. It is a hardy, long lived tree. Height 80 to 100 feet.

Elm, Lake City. This is a grafted form of the American Elm. It is distinguished by symmetrical form and rich foliage.

Hackberry. Hackberry shows a remarkable tolerance to a wide variety of soil and moisture conditions. It grows rapidly but is tough and strongly branched. Height 60 to 70 feet.

Linden. This handsome shade tree is also known as the Basswood. It is hardy and grows rapidly. Bears clusters of small white and cream-colored flowers. Height 75 feet, spread 50 to 60 feet.

Maple, Norway. A good tree for street or lawn specimen planting where good form and shade are needed. Reaches a height of 60 feet.

Maple, Silver. Here is a quick growing Maple that is suited where the more hardy and permanent trees are required. Height 75 to 100 feet.

Maple, Schwedler. The leaves are an attractive red during the early part of the summer. It is best used as a specimen and should have full sunlight for greatest coloration. Height 40 to 50 feet, spread 30 feet.

Olive, Russian. The serviceability and beauty of this tree make it most acceptable for snow catch purposes. It thrives under the most adverse conditions of soil and climate. Height 25 feet.

Poplar, Lombardy. Here is a suitable tree for planting in rows. It is quick growing and hardy. Height 60 feet.

Poplar, Bolleana. A fast growing tree with the Lombardy habit of growth but with more color. The leaves are glossy green above and silvery white beneath. Height 60 feet, spread 6 to 8 feet.

Pea Tree, Siberian. Many people know this shrub as Caragana. It thrives in a wide variety of soil conditions, withstands drought and is perfectly hardy. It is exceptionally good for snow catch plantings. Height 12 to 15 feet.

Willow, Golden. Colorful golden branches add to the usefulness of this Willow. It will grow under a variety of conditions, but will thrive especially in wet soils. It is suitable for planting in rows 3 and 5 where quick growth is needed. Height 40 feet.

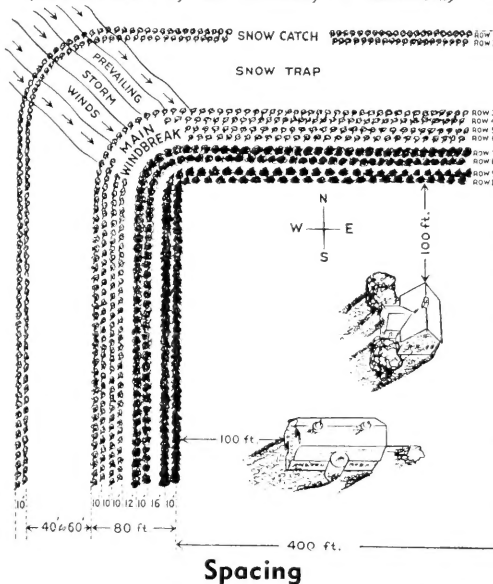

Willow, Niobe Weeping. This quick growing tree is the best of the Weeping Willows. It may be used in rows three and five of the shelter belt. Height 40 feet.

POPLAR, LOMARDY	1.00		1.50	2.00	
WALNUT, BLACK			3.00		10.50
WILLOW, NIOBE WEEPING	1.75		4.00		

Maple, Crimson King. (Plant Patent No. 735.) This beautiful ornamental is a form of the Schwedler Maple that was selected in Europe for its brilliant crimson leaves. The color is retained throughout the summer.

Maple, Sugar. This Maple has an oval shape with symmetrically round crown. It will grow under various conditions. In fall the leaves turn from a bright green to showy reds and yellows. Height 80 feet, spread 40 to 50 feet.

STANDARD SHELTER BELT PLAN
(Recommended by the University of Minnesota)

All trees and shrubs planted in the shelter belt should be staggered to fill up the gaps and thereby to more effectively check the wind. The spacing between the rows is shown in the plan above. The distances may be extended by 2 to 4 feet in the main windbreaks (rows 3 to 10) if space is available. The trees or shrubs used in the snow catch (rows 1 and 2) should be planted 4 feet apart in the row; all other trees should be planted 6 feet part in the row. The trees in rows 3 and 5 may be cut for fuel or posts whenever they begin to crowd the more hardy, long-lived trees in rows 4 and 6.

SHELTER BELT EVERGREENS

Junipers. Both the Red Cedar and the Silver Cedar are available for shelter belt plantings. For description see page 4.

Pine, Jack. This fast growing Pine is very hardy and will thrive on soils too poor for other Pines. Height 50 feet.

Pine, Norway. A very fast grower desirable for group planting.

Pine, Ponderosa. Or "Bull Pine." It is probably the best Pine for heavy soils. Height 60 to 80 feet. Vigorous, drought resisting.

Pine, Scotch. The qualities of Scotch Pine are similar to the Ponderosa Pine. Needles are shorter and brighter green.

Pine, White. This Pine is excellent for shelter belt planting; it is easily transplanted, has long life and rapid growth. Height 70 to 80 feet.

Spruce, Black Hills. See description page 4.

Spruce, Colorado Blue. See description page 4.

Spruce, Norway. The rapid growth of this Spruce makes it a favorite shelter belt tree. Height 50 to 60 feet.

Spruce, White. Similar in appearance and characteristics to the Black Hills Spruce but a little faster in growth.

Old Fashioned BLEEDING HEART

The flower that everyone loves. Strong plants that will bloom this year.

85c each; 3 or more, 75c each.

ZABELI HONEYSUCKLE

Here is a vigorous, upright Honeysuckle with attractive red flowers. It has bright red berries in late summer to autumn. It is hardy and does well in heavy shade. Height 8 to 10 feet. See next page for prices.

Zabeli Honeysuckle

GIANT FLOWERING CLEMATIS

The most beautiful of all climbing vines that will bloom continuously for six to eight weeks from July.

Red. Ville De Lyon. A grand shade of bright red that makes a wonderful display. Rapid growing.

Blue. President. This beautiful blue Clematis is one of the newest colors. A very good grower, free flowering.

Purple. Jackmani. An old favorite with large velvety purple flowers of breath taking beauty on trellis or porch.

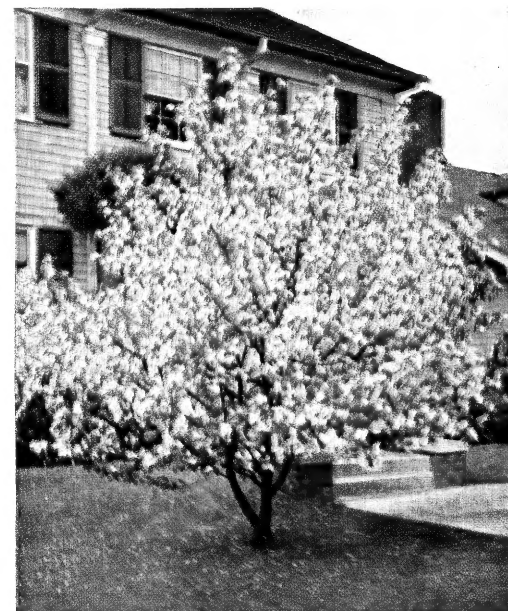

All Bailey's Clematis are two year old, field-grown plants.

2-year-old Strong Plants: \$1.75 each; 3 or more \$1.60 each.

On the next page is price and description of other vines we offer.

Plant Bailey's Flowering Shrubs Early This Spring for Next Summer's Bloom

VINES

Bittersweet. For winter bouquets. Several vines planted close together will fruit more heavily than one.

Ivy, Boston. The small dark green leaves are held close to the wall to form a tight screen. Leaves turn a fine shade of red in autumn.

Ivy, Engelmann. This useful climber is a well known vine. The foliage turns a bright scarlet in the fall. The vine is hardy, vigorous and fast growing.

Honeysuckle, Scarlet Trumpet. A very popular climbing vine. Dark green foliage and scarlet flowers throughout the summer.

Honeysuckle, Everblooming. A delightful new vine, fragrant flame-coral trumpets lined with creamy gold. Blooms abundantly from May until frost. It can be clipped to form a neat hedge, a striking specimen shrub, or allowed to grow naturally to climb a trellis.

PRICES OF STRONG 2-YEAR OLD VINES

	2-Yr. Strong
Bittersweet	\$1.00
Ivy, Boston	1.25
Ivy, Engelmann75
Honeysuckle, Everblooming	1.25
Honeysuckle, Scarlet Trumpet	1.00

Handling and Planting Tips

1. Water plants in the packages as soon as you pick them up. Do not allow the roots to dry.
2. "Heel-in" plants until you are ready to plant.
3. Carry plants for planting in a pail half full of water.
4. Dig holes large enough to permit the roots to spread out in a normal manner.

Almond, Double Flowering. Double, rose-like pink flowers cover the branches in early May. This shrub is best in front of taller shrubs. It is not recommended for climates similar to northern Minnesota. Height 4 feet.

Barberry, Red Leaf. Deep red leaves that last throughout the summer. The color is best when the shrub is grown in full sunlight. The bright red berries are colorful through fall and winter. It is also used as a hedge. Height 2 to 3 feet.

Barberry, Thunberg. This low spreading shrub is very useful in foundation plantings, borders and hedges. The bright green leaves turn a brilliant red in autumn, attractive red berries showy throughout the fall and winter. It is hardy and will tolerate shade. Height 4 to 5 feet.

Buckthorn, Common. If a heavy impenetrable barrier is desired this shrub will meet your needs. It may be trimmed as a formal hedge. It can be adjusted to desired height from 3 to about 8 feet. It is not recommended for rural areas because it is host to oat rust.

Cotoneaster, Peking. Clusters of small pink flowers appear in early June, followed by black fruits. The leaves are dark and glossy. It is completely hardy and thrives on poor, rather dry soils. Height 6 to 8 feet. A very desirable hedge.

Currant, Alpine. Here is an especially useful landscape shrub, upright and compact. The leaves are small and dark green. Will grow in a variety of soils and partial shade. It is thoroughly hardy. Height 4 feet, spread 3 feet. The outstanding dwarf hedge.

Elder, Golden. Bright golden yellow leaves mark this shrub throughout the summer. It makes a fine specimen and should be in full sunlight for the best color development. It is hardy and rapid growing. Height 6 to 8 feet.

Honeysuckle, Tartarian. This shrub is excellent for screens, backgrounds and specimens. The flowers are variously colored from pink to white, appearing late in May. Bright red berries offer color in autumn. The shrub does fairly well in heavy shade. Height 8 to 10 feet.

Honeysuckle, Zabel. See page 4 for description.

Hydrangea, Peegee. See page 8 for description.

Hydrangea, Snowhill. See page 8 for description.

Lilac, Persian. The beautiful lavender flowers appear late in May. It is perfectly hardy. Height 6 to 8 feet.

Lilac, Purple. Old-fashioned old favorite.

Page 7 we list the varieties of French Lilac we offer in choice colors.

Mockorange, Golden. This compact shrub has brilliant yellow foliage. A mass of white flowers in May and June. It seldom grows over 4 feet tall; useful in borders, specimen and foundation plantings.

Siberian Pea Tree. (Caragana arborescens.) It is often used as a tall, informal, flowering hedge. It may or may not be trimmed. The small yellow flowers appear in May. It is thoroughly hardy and drought resistant.

Snowball. You will recognize this shrub as one that has stood up well through the years. Its large, round clusters of white flowers are a familiar sight in May and June. It grows fairly well in heavy shade. Height 6 to 8 feet.

Snowberry. (Red Snowberry). A very fast growing shrub commonly called Red Snowberry or Coralberry. It does very well in the shade. The flowers are coral-red that cluster along the stem.

Snowberry. (White Snowberry). Clusters of large, pure white berries are of striking attractiveness from September through winter. It is very hardy and does well in fairly heavy shade.

Spirea, Anthony Waterer. Masses of crimson flowers appear in July and continue irregularly throughout the summer. It is possibly the most popular of the low growing shrubs. It is very useful in shrub borders and foundation plantings. It is hardy and does well in fairly heavy shade. Height 3 feet, spread 3 feet.

Spirea, Froebeli. Description on page 6.

Spirea, Vanhoutte. Many admirers know this shrub as "Bridal Wreath." The small leaves give the foliage a fine texture, and the recurring habit of the branches provides gracefulness. The branches are covered with white blossoms in mid-spring. It is useful in shrub borders, foundation plantings and hedges. It is thoroughly hardy. Height 6 to 8 feet.

TAMARIX, KASHGAR. Feathery, bluish gray foliage gives this shrub an unusual airy charm. It bears long panicles of bright pink flowers in July and August. Height 12 to 15 feet.

Flowering and Ornamental Plums and Crabs

Add Beauty to Your Lawn and Garden

BECHTEL'S DOUBLE FLOWERING CRAB

Beautiful fragrant double pink flowers. Each flower is like a pink Camellia. The ideal tree for small yards.

CRAB, HOPA

Beautiful deep red blossoms. Many consider it the most beautiful of the flowering Crabs. The foliage is dark green with a red cast. The small red fruits remain on the tree until autumn. Spreads to 15 feet, height 20 feet.

CRAB, DOLGO

The Beautiful White Flowering Crab

It is equally attractive when in flower or when laden with its abundant, brilliant red fruits. The fruit is very desirable for jelly.

PLUM, CISTENA

The showy, rich, purplish foliage of this Plum is probably the most striking of the red-leaved varieties. The best color development is obtained in full sunlight. Height 4 to 5 feet.

DOUBLE FLOWERING PLUM (Prunus triloba)

This fine shrub is covered with pink, rose-like flowers in April and May. It is sometimes known as the "Rose Tree of China." It has colorful glossy brown bark. Height 6 to 8 feet.

PRUNUS, NEWPORT

A beautiful specimen tree for your yard for color throughout the spring, summer and fall.

A well planned planting of Bailey's Evergreens will make your home and grounds more attractive. (On page 4 is full description and prices of all our evergreens.)

HYDRANGEA, PEEGEE

(*Hydrangea paniculata grandiflora*). Its large heads of showy bloom are well known. The flowers do not appear until late summer; white at first, the color gradually changes to pink, later to purple. It is completely hardy. Height 4 to 6 feet.

HYDRANGEA, SNOWHILL

(*Hydrangea arborescens grandiflora*). The large clusters of white flowers are somewhat more flattened than those of Peegee. It blooms profusely in July and early August. It is useful in low foundation plantings, hardy and well adapted to shady locations. Height 4 feet, spread 4 feet.

Turn to page 7 for the complete list of Flowering Shrubs and Ornamental Trees.

Philadelphus MINNESOTA SNOWFLAKE Plant Patent No. 538 NEW DOUBLE MOCK ORANGE

The most valuable and widely accepted shrub introduction of recent years.
